Energy saving coatings

that keep your building cool in summertime
and innovative paints that keep your building warm in winter

Let's get Wiser with Energy

we offer unique, out of the box thinking
energy saving coatings
We offer ROI simulations
To help decision makers do the investment

4EVERblue

Reflects 54% of the heat.
47% VLT reat glare protection.

4EVER DARK is the extreme sun blocker.
Lifetime of 8 years, applicable by
roller or airless

2

WHITE

changes your black flat roof into a white one
Surface decreases from 80°C to 30°C.

FACADE **5** FINISH

your roof or metal walls can stay 30% cooler available in every RAL color

INSUL **8** *Deco*

reflects 30% of the IR radiation of your radiator .

Just applicable as a standard indoor paint

FACADE **5** *protect*

makes your building dry, but keeps it breathable. Dirt and grease has no longer any effect on your wall or floor.

In 2019 we will expand to the UK
(and USA) via a network of
Authorised Liquisol Applicators
and via direct sales

The Authorised Liquisol Applicator
will receive a special discount.
We mention them on the website.
They receive training so they will
be able to grant a 5 year warranty.

We make use of pouch bags shipped in special designed card-boxes. That way the risk of transport damage is reduced to the minimum

Making use of pouch bags, we use 60% less packaging plastics and have 15% more transport volume.
