

Braintree Solar Electric Forecourt®

Designed with the EV user experience at the centre and optimised for convenience, speed and scalability

Braintree Solar Electric Forecourt®

The ultimate electric vehicle charging experience, powered by low cost clean energy that supports the grid

The Solar Electric Forecourt[®] is highly innovative and will transform the electric vehicle public charging experience, especially for users without off-street parking.

Over 100 Electric Forecourts[®]: a UK-wide network with Braintree first in Q1 2020

Convenient: located adjacent to key infrastructure, population centres, business locations

Reliable: Industry leading equipment suppliers

Dependable: Staff on-site, easy open charger access – no special RFID card or contract

Economic: leverages multiple revenue streams from EV charging, solar, battery, convenience retail to secure Investor returns and Consumer pricing similar to residential charging

Ultra-Fast: less than 30 minutes for a full charge even when all charging bays are occupied
